InternetNZ

InternetNZ is an open membership, incorporated society, established to promote and protect the Internet in New Zealand. It

has overall responsibility for the .nz domain name space, and is an advocate for the interests of Internet users and domain name registrants in New Zealand and overseas.

InternetNZ staff and volunteers are active in a wide range of policy areas. They work with government and industry to promote self-regulation, develop and help implement new technical standards, and inform and educate decision-makers on the reality of dealing with the Internet in public and technical policy.

InternetNZ has a subsidiary company, .nz Registry Services (NZRS), which manages the register of domain names and associated network infrastructure. It also maintains the Domain Name Commission (DNC), responsible for the development and enforcement of policies and procedures that govern the Shared Registry System of the .nz domain name. Both the DNC and NZRS have their own boards.

InternetNZ is committed to the development of a sound policy framework for the Internet in New Zealand, in conjunction with government bodies and the local Internet community.

Domain Name Commission

Management of the .nz domain name space is the responsibility of the Domain Name Commission, under the governance of the .nz Oversight Committee. This report highlights some of the work done during the 2006/07 financial year, and illustrates the continued growth in .nz names.
